Taif Malouh Aldehbash

iOS Developer

Riyadh, Saudi Arabia | 0537166973 | Taifmaldehbash@gmail.com | linkedin.com/in/taif-aldehbash

PROFESSIONAL SUMMARY

iOS Developer with 3+ years building and shipping native iOS and cross-platform mobile applications. Sole iOS developer behind two production ride-hailing apps (Swift, UIKit, Google Maps SDK); currently leading mobile development of a Gen-AI platform serving government clients. Strong across SwiftUI, UIKit, Core Data, Combine and async/await, and App Store delivery, with UI/UX design training.

SKILLS

iOS: Swift, SwiftUI, UIKit, Core Data, Combine, async/await, MapKit, Google Maps SDK, Core Location, Push Notifications (APNs), in-app payment integration, Xcode, TestFlight, App Store Connect

Cross-Platform & Web: Flutter, Dart, Nuxt Vue, HTML, JavaScript

Backend & Data: Firebase (Realtime Database, Cloud Firestore), RESTful APIs, SQL

Tools: Git/GitHub, Jira, Trello, Docker, Linux, Unity, C#, Java, Python

Languages: Arabic (native), English (fluent)

WORK EXPERIENCE

Software Engineer Apr 2024 – Present

ICS Arabia, Riyadh

- Lead Mobile Developer for FinBlade AI, a Gen-AI productivity platform serving multiple government clients and organizations
- Developed and shipped all features of the FinBlade AI mobile app (Flutter), including the Workflow AI, Apps, and Data Management modules
- Built native iOS features and platform integrations in Swift to extend the Flutter app's capabilities
- Led the full refactoring and UI/UX redesign of the mobile app, improving usability and visual consistency across devices
- Collaborated with cross-functional teams to integrate Gen-AI features across mobile and web platforms

iOS Developer Aug 2023 – Sept 2024

Minute Taxi Routing Company, Riyadh

- Sole iOS developer for Minute and MinuteDriver, two production ride-hailing apps; owned design, development, testing, and deployment end to end for over a year
- Built core ride-hailing functionality in Swift and UIKit using the Google Maps SDK, Core Location, push notifications, and in-app payment integration
- Architected the data layer with Firebase Realtime Database and RESTful APIs for real-time ride tracking
- Published releases to the App Store and managed internal testing cycles through TestFlight
- Identified and resolved performance bottlenecks to keep both apps fast and reliable

Trainee (Business Analysis) Dec 2022 – May 2023

Amlak International, Riyadh

- Documented business processes and defined user stories and requirements; verified compliance with SAMA regulations

Software Engineering Intern 2021

Communication Experts LTD, Riyadh

- Developed Plantify, an Android plant-retail application, and contributed to web and desktop development for the AnimeKey streaming service

PROJECTS

Nahaj
Educational iPad app delivering 3D science experiments for children in Augmented Reality; published to the App Store (Flutter, Unity, C#, Firebase)

Fastway
Campus delivery app built with Swift, SwiftUI, Apple Maps, and Cloud Firestore in an Agile Scrum team

UI/UX Case Studies (Behance)
Vox Cinema app redesign; Rakaz AI real-estate platform; Najid emergency-response app

EDUCATION

B.S. Computer & Information Sciences, Software Engineering 2022
King Saud University, Riyadh

- GPA: 4.51/5.00

CERTIFICATIONS

- Tuwaiq Academy UI/UX Bootcamp (2025)
- Tuwaiq Academy Alibaba Cloud Computing Bootcamp (2023)
- The Complete iOS App Development Bootcamp - iOS & Swift (2023)
